

Simulation after Chapter 8 in MindTap

Hands on activity. Data files are required. This assignment opens in Week 4 and is due in Week 8. Students are expected to spread it out over 4 weeks. This assignment is worth 100 pts.

This simulation is assigned after students have completed Chapter 8. It includes 7 “jobs.”

The jobs simulate activities in a realistic work environment. They reinforce the skills and knowledge learned from studying chapter concepts.

Activities and associated data files can be downloaded at the beginning of each simulation. Assignments are returned via Dropbox in MindTap and are manually graded by the teacher.
