

Ebook font too small?

If you are using the ebook for your textbook, you may find the font to be too small. Try this:

1. Toward the bottom of the ebook page, there is an icon, “ Aa “.
2. When you hover over it, a screen tip pops up that says “View options”.
3. Choose “View screen by fit width not fit height”.

This should help adjust the font size to make it readable.

Also, for other magnification issues, there is a magnifier tool in the Accessories folder, Ease of Access subfolder, in Windows 7. Click to turn it on. It is ‘self-explanatory’. To turn it off, click the large magnifying glass to display the control window, and click the X button to turn Magnifier off.
