How do I see graded projects in SAM?

SAM projects are immediately available for viewing after you submit for grading. Projects may be submitted 5 times for grading. So, you may look at your graded projects, fix your errors on the original project file, and resubmit for a better grade.

You can view graded projects from the **REPORTS** page in SAM. Watch this video to learn how to do projects and how to view graded projects.

Again, you have 5 tries on each project. Although SAM records all project scores, I only record the highest score when calculating your final grade.
